Asmi Mishra

Pensacola, FL | (850) 266-4329 | asmimishra05@gmail.com
linkedin.com/in/asmi-mishra-b178762aa | github.com/AsmiMishra | asmimishra.github.io

Computer Science and Cybersecurity dual-degree student focused on offensive security and detection engineering. Hands-on experience designing isolated attack/detection labs, executing MITRE ATT&CK techniques, and analyzing network telemetry with Zeek. National cyber-defense competitor (CCDC, NCL) and co-author of two peer-reviewed security papers.

EDUCATION

University of West Florida — Pensacola, FL
B.S. Computer Science & B.S. Cybersecurity; Minor in Interdisciplinary Honors — Expected May 2027 | GPA 3.64 / 4.00
M.S. in Cybersecurity (Software & System Security) — Expected 2029 (continuing directly after B.S.)
Honors: Florida Academic Scholarship (2023–2027); President's List (2 terms), Dean's List (5 terms); IB Diploma

RELEVANT COURSEWORK

In progress (Fall 2026): Penetration Testing with AI for Security Assessments, Malware Analysis, Secure Software Development
Completed: Computer & Network Security, Database Security, AI & ML in Cybersecurity, Systems & Networks I–II, Network Fundamentals, Linux System Administration

TECHNICAL PROJECTS

Purple-Team Detection Lab — *Python, Zeek, Kali Linux, VirtualBox, MITRE ATT&CK*
github.com/AsmiMishra/purple-team-detection-lab

- Built a network-isolated two-VM lab (Kali attacker; Ubuntu target with a Zeek sensor) and executed six MITRE ATT&CK techniques (T1046, T1018, T1021.004, T1071.001, T1048), measuring detection coverage against live Zeek logs.
- Identified evasion gaps: timing-throttled (`-T1`) port scans that defeat burst-based detection, and ARP-based host discovery invisible to connection logs.
- Built a Python parser that flags techniques from Zeek logs and outputs a coverage matrix documenting detections and gaps.

CYBERSECURITY COMPETITIONS

- Collegiate Cyber Defense Competition (CCDC) — Spring 2025, Spring 2026
- National Cyber League (NCL) Capture the Flag — Spring 2024, Fall 2024, Fall 2026
- Hivestorm — Fall 2024
- CyberPatriot — 2017–2022
- FBLA Cybersecurity — 2nd Place, District 1 (2023)

EXPERIENCE

Computer Science Teaching Assistant — University of West Florida | *Aug 2025 – Present*

- Support Data Structures & Algorithms I (COP 3530) and Programming Using C++ (COP 2334); assist students with debugging, algorithm design, and C++/Java fundamentals.

Verification Associate Intern (Incoming) — Re Vera Services, Pensacola, FL | *Jan – May 2027*

- Incoming internship in verification operations (employment and income verification), with an emphasis on accurate data handling and compliance.

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL
Security & Tools: Nmap, Burp Suite, Wireshark, Zeek, netcat, Kali Linux, MITRE ATT&CK, NIST CSF
Concepts: Penetration testing methodology, OSINT & reconnaissance, enumeration, vulnerability assessment, threat modeling
Hands-On & Platforms: TryHackMe (Jr Penetration Tester path, 20 rooms), VirtualBox labs, Linux, Git, Apache Spark, scikit-learn

LEADERSHIP

Secretary, UWF Women in Cybersecurity (WiCyS); Vice President, UWF Indian Student Association (2024–2025)
